The tube can be used without special precautions against microphony in circuits in which the input voltage exceeds 20m volts for an output of 50m watts of the output tube.

¹⁾ The absolute permissible maximum of the battery voltage is 110 volts.

²⁾ Only for grid biasing.

³⁾ Based on a battery voltage of 67.5 or 90 volts decreased with the negative bias for the output tube.

⁴⁾ Decoupled by a capacitor of 0.47 μ F.
