

CATHODE-RAY TUBE

The TELEFUNKEN Type 3 BNP 1 is a three inch, flat face, single beam, electrostatic deflection and focus Cathode-Ray Tube, with high light output, high deflection sensitivity and small spot size. Specially shaped deflecting plates allow deflection with symmetrical as well as asymmetrical voltages for D1, D2 and D3, D4.

CATHODE-RAY TUBE CHARACTERISTICS NOTES

1. Visual extinction of undeflected focused spot.
2. It is recommended that the deflecting-electrode-circuit resistance be approximately equal.
3. Connect free deflecting electrodes to anode.
4. For a beam current of 25 microamperes DC in accordance with Mil-E-1C specification.
5. The deflection factor (for both D1D2 and D3D4 plate pairs, separately) for deflections of less than 75 % of the useful scan will not differ from the deflection factor for a deflection of 25 % of the useful scan by more than specified amount.
6. The edges of a raster pattern with the mean dimension 40×40 mm will not deviate from the mean dimension by more than the specified amount.
