

ELECTRONIC TUBE REFERENCE

6336

Power - Triode electronic tube

CONSOLIDATED TECHNICAL DATA

2 SECTIONS

CONSTRUCTION

TRIODE-TRIODE

High-current dual power triode designed primarily for stabilized power supplies. Its two low-resistance, high-transconductance sections control large DC current with relatively little voltage drop, making the tube especially suited to series-pass regulation and power-control circuits.

GENERAL CHARACTERISTICS

BASE DESIGNATION	—	BASE PINS	—
NOMINAL HEATER	6.3 V / 4.75 A	PARALLEL HEATER	— / —
HEATING	Indirect	SERIES OPERATION	Not specified
CATHODE ARRANGEMENT	Separate cathodes	SECTION CONSTRUCTION	Similar

SECTION RATINGS

SECTION1 Triode

No fixed ratings recorded.

Representative of two high-current regulator triode sections.

SECTION2 Triode

No fixed ratings recorded.

Second physical triode section; dual-triode structure per reviewed datasheet. No unsupported electrical ratings duplicated.

The 6336 is a high-power dual triode with low plate resistance and high transconductance, intended as a regulator tube in stabilized power supplies.
